Bud, 25X1A

As I mentioned to you, I have had the conversation with [REDACTED] about the possibility of their briefing selected DD S&T people on [REDACTED]. ([REDACTED] being Defense representat [REDACTED]

25X1A

OLD
There appear to be several areas of interest to us; side looking radar, moving target indicator (MTI) ground search radar, over the horizon radar, the TFX ECM sub-system, Military Orbiting Satellite as a recon device with special emphasis on the role of man and image motion compensation, and a proposal for a recon drone. These areas are in addition to their general competence in computers, guidance, communications, etc., associated with their major participation in Hawk, Sparrow, Sonar, Polaris ECM Penetration aids, and Nike X; and the work of Autometrics on photo interpretation which I understand is known to us.

I suggest a half-hour briefing by them on each of the 6 subjects, except the drone which you may wish to discuss privately with [REDACTED] because of prior involvement in this proposal of Weisner and President Kennedy. If you approve, the briefings can be set up for ~~22 or 23~~ October. *Yes X No*
